

# STAINLESS STEEL WASHING TANK WITH BACK LIGHT

# GALVANISED WASHING TANK WITH BACK LIGHT

## WASHING TANK WITH BACK LIGHT

Screen making is playing an important role in screen printing technology due to printing complicate fine lines & fine halftone dots etc. Inadequate light is chances for screens being rejected. In today's world of competition, it is unaffordable to waste time in screen making and waste expensive screen reclaiming chemical etc. due to rejections. Considering the above factors in mind GRAFICA introduces Screen Washing Tank with Back Light system. The complete body of the tank is made of Stainless steel to avoid corrosion (for economical option galvanized body duly P.U. painted is also available). There are chances of ghost image been left out due to insufficient light. Yellow backlight prevents pre exposure of the stencil while washing the screen.

### STANDARD FEATURES:

- Stainless steel (SS 304) construction helps to work with all kinds of chemical generally used in screen reclaiming & avoids corrosion.
- Yellow back light avoids pre exposure while washing the screen.
- Good drainage system ensures no water left in the tank.

### TECHNICAL DATA:

Model No of Stainless Steel Body	GF-1824 WTS	GF-3040 WTS	GF-4896 WTS
Model No of Galvanized Body	GF-1520 WTG	GF-3040 WTG	GF-4896 WTG
Max. Screen Frame Size	30" x 40" OD	46" x 56" OD	72" x 128" OD
Power Supply	220 V AC / 16 Amps / 1 PH / 50 Hz	220 V AC / 16 Amps / 1 PH / 50 Hz	220V AC / 16 Amps / 1 PH / 50 Hz
Power Consumption	0.5 HP (0.37 kW)	0.5 HP (0.37 kW)	0.6 HP (0.5 kW)
Overall Dimensions	5.4' (L) x 2.8' (D) x 5.5' (H)	6.4' (L) x 2.8' (D) x 6.2' (H)	12.4' (L) x 3.2' (D) x 7.6' (H)

Technical data subject to change without notice  
We accept any custom sized orders
